

I AM CONCERNED ABOUT YOUR RETIREMENT

Thank you for your continued interest in the Biweekly Mortgage Association.

Did you know?

The Social Security Department states that when the average American retires they will retire on one-half of their current net income. This means that most retired persons will have to work if they have a mortgage whether they want to or not. Other questions are will they have the health to be able to work? Will there be jobs available for them?

It does not have to be this way.

Our Clients plan to retire their biggest payment the same year they retire, because they have their mortgage on our biweekly payment service.

To customize the biweekly to your needs and find out ***exactly how you can retire worry-free, without a mortgage payment***, call **1-800-248-8840** today!

Sincerely,

William Thomas – BWMA Founder
